💼 PROFESSIONAL EXPERIENCES

○ **Software Engineer - Criteo**

10/2019 - Now

- Creation of realtime/batch data pipeline to detect abnormal traffic using Flink and Spark
- Development of traffic filtering component in high volume and low latency system using C#, Scala
- Building internal debugging system using C# and ReactJS

○ **Fullstack Software Engineer - Atos**

09/2017 - 02/2019

- Frontend/Backend development of an Open Source deployment tool Alien4Cloud
- Integration of AI use cases for the French defense
- Technology: Java8, Angular, Spark, Mesos, Jenkins, Docker

○ **Software Engineer - Google Summer of Code - Apache**

05-2018 - 08/2018

- Design and implementation of a state-of-the-art data-parallel parameter server from compilation to runtime for Apache SystemML
- Technology: Java8, Spark, Distributed system, CNN

○ **Fullstack Software Engineer - Internship - Atos**

03/2017 - 08/2017

- Implementation of an orchestrator component in a deployment tool Alien4Cloud
- Technology: Java8, Scala, Spring, Maven, Docker

🏛 EDUCATION

○ **Polytech Nantes - Computer Science - Master**

2015 - 2017

○ **South China University of Technology - Computer Science - Bachelor**

2011 - 2015
